Stop wasteful printing!

employ Levifi's

Managed Print Services

a program for smarter printing, reduced cost, and a drastic reduction in device downtime

Did you know...

- 90% of businesses don't track or understand how to track printing costs.

- a typical printer's "low toner" indicator lights up when there is still 20% of toner left, causing wasted toner.

- your supply closets might be full of excessive inventory of toners, including expired toners and/or toner for printers no longer in use.

- color printing can cost 5-10 times more than black and white.

- running out of toner is one of the most common "emergencies" in an office.

- Studies show that 1-3% of annual revenues are consumed by office printing costs.

Levifi Managed Print Services Process:

1. Discover what you have:

Most of our clients have no idea how many print devices they have and what these devices cost to operate. Our assessment tools allow us to quickly compile a report of your printing devices, their average usage, and the total cost of operations.

2. Outsource the Management of Your Printers:

Many organizations outsource non-core areas of their business to save money and improve service. Levifi can handle the management of your printers through a simple cost per page program which includes supplies, help desk support, and service.

3. Optimize Your Fleet:

We will consult with you on a regular basis to review your print usage reports. Using this data, we can collaborate to uncover additional ways to reduce costs and improve productivity.
